

【Specification of Anti-Counterfeit Hologram Seal】

Counterfeits are confirmed by the combination of hologram seal and Data matrix.

◎ How to use

- ① Search for “CheckIfReal” in the app store of your smartphone, and install the app "Authentic Vision - CheckIfReal".

- ② After starting the app, scan the hologram seal with the following method.

- Remove the shrink package on the product if there is any.
- Ensure enough brightness at the surrounding.
- Scan the shield and code within the frame.

【Authentic】

Tab “Visit official website” to link to product page.

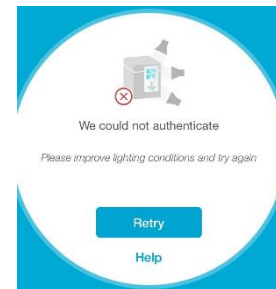

【Counterfeit】

Tab “Report” or retry the scan process.

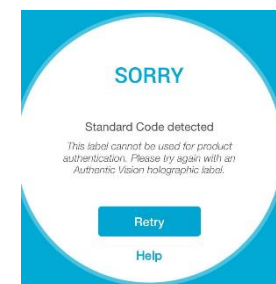

【Scan Error】

Check environmental brightness and rescan.

【QR Code detected】

Please contact JBP.

Printed code is not supposed to be QR code.
